EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 10 and 29-33 are rejoined.

Claims 10 and 29-33 have been withdrawn from consideration by the examiner under 37 CFR 1.141 as being drawn to a non-elected species.

Upon the allowance of a generic claim 1, claims 10 and 29-33 previously withdrawn from consideration under 37 CFR 1.141 have been rejoined.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 11, 2006 has been entered.

Art Unit: 1711

Applicants amend claim 1 by inserting a definition that a polymeric thiol precursor includes a thiol bound to a protective group in step (a), and removing said protecting group in step (b) before reaction with a compound comprising an episulfide group.

The present claims disclose a method of synthesizing a block copolymer comprising the steps of: (a) providing a first compound comprising a polymeric thiol precursor comprising a thiol bound to a protecting group; (b) generating a polymeric thiol from said first compound by removing said protecting group; and (c) initiating a polymerization of a second compound comprising an episulfide group with said thiol produced in step (b) thereby producing a block copolymer comprising a terminal thiol.

The closest reference of record is GB 1 348 045 and WO 00/44808.

The primary reference to GB'045 does not disclose a thiol bound to a protecting group formed in step (a) and does not disclose removing said protecting group in step (b) before reacting with a compound having an episulfide group.

There is no motivation to combine the teaching of GB'045 with WO 00/44808 because the primary reference does not disclose all steps in the process for making a synthesizing block copolymer specified in the present claims.

Claims 10 and 29-33 are rejoined because a first component comprising a hydrophilic polymer includes polypeptides and polysaccharides referring to claims 2, 4 and 1.

Claims 1-34 and 62 are deemed contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
